

GEMENC

in service of nature

Gemenc Forest and Game Co. Ltd. is one of the biggest state owned companies in Hungary being engaged in the management of hunting fields. This hunting field of 52 000 hectares is located in the Middle and Southern part of the country from Szekszárd to the southern border along River Danube.

The forest company manages one of Europe's largest flood-basin forests. The hunting fields are in the Gemenc, on the two sides of the river Danube. The main areas encompass 52 000 hectare: Gemenc, Béda-Karapanca and the Kiskunság.

The hunting field is the habitat of red deer known all over the world. Various record-size trophies exemplify the success of the deer system of Gemenc Co. Ltd. The biggest is the one shot in 1986 and awarded with 271,00 C.I.C. points which at that time was the world record-holder of red deer trophies.

A big population of wild boars is living in the hunting field. The capabilities of the area enables a bag of 30-50 wild boars with 10 hunters each day in an open-air beating for wild boars.

Important!

Starting from the fact that the bagged trophy is taken away from Hungary and in this case the trophy must be regarded as an export commodity, the VAT is not involved in our charge of bagging. You are requested to hand the bill and costumes declaration written out by the evaluation place down at the customs house!

Otherwise we have to take in you the VAT of 25%. In case of trophy games (except wild boar) +-15% deviation must be accepted. In case of bagging of one wild boar the exact length of tusk must be sized up before shooting, so the full price of the tusk must be paid. The extra charge of medal is involved in the prices of trophy wild species.
